

TEMPOSEAL

Machine specially designed to allow the closure of all types of pouches previously welded on 3 sides in sealable materials such as paper, plastic films or aluminum. A touch screen allows production monitoring and control of sealing parameters. Fully self-controlled machine with cycle stop in case of exceeding alarm thresholds. Closure of sealing jaws controlled by the operator. Automatic opening of the jaws.

characteristics:

- Pouches width from 80 to 500 mm, depending on model
- Smooth or ridged weld
- Sealing time, temperature and pressure managed by the machine
- Memory settings, password protected
- Connection sockets for calibration
- 100% French manufacturing – CE compliance

Options:

- Height adjustable frame support
- Stainless steel electrical cabinet
- Other on request
